

Professional Summary

Senior Software Engineer and Tech Lead with **6+** years of experience building and scaling backend and distributed systems at **Oracle, Google, and Amazon**. Currently lead **7+** engineers, owning **3 Products** and **6+ Microservices**. Recognized as a **Certified Bar Raiser** at Oracle. Expertise in **cloud-native systems** across **Healthcare, Search, and Finance**, with strong skills in **Java, Python, OCI, AWS, distributed and asynchronous Systems**. Delivered **1M+ lines of production code**. Applied **Machine Learning and Generative AI** to build intelligent template and report generation systems, developed **MCP Server** for automations and improving developer productivity, and built **anomaly detection systems** at Amazon.

Experience

Oracle

Apr 2024 – Present

Senior Member of Technical Staff (SDE III) – Promoted to Tech Lead (Oct 2025)

Bengaluru (Remote)

- Technical lead in Oracle Health's Clinical Reporting / Output Management team, owning **MRO / Clinical Reporting Gen2**, a platform capability used by **25+** concept teams with **20+** additional concepts on the roadmap.
- Architected and implemented **7 Microservices** for mro-gen-services, a **Java Micronaut**-based medical record output generation platform; redesigned the initial service architecture into a modular Gen2 reporting system spanning API, template management, data extraction, report generation, Pdf output assembler.
- Drove scalable report-generation architecture using **Kafka, Redis, SQL, Elasticsearch, Large Semantic Object Storage, and OCI Cloud**; introduced async processing, fast/slow lanes, bulk generation, retries, DLQ handling, idempotency, horizontal scaling, authN/authZ, audit logging, metrics, dashboards, and alerting.
- Led MRO delivery across **49 closed epics** and **39 open/planned epics**, completing **89 Jira items / 251 story points** across architecture, feature delivery, release readiness, concept onboarding, compliance cleanup, monitoring, deployment readiness, and platform quality.
- Improved large-report PDF generation for a **262-page report**, reducing render latency from **9.0s to 4.2s**, heap usage from **891.7MB to 426.2MB**, and output size from **17.6MB to 13.7MB** through renderer-level optimization, file-backed generation, streaming responses, and metadata improvements.
- Accelerated cross-team adoption by supporting **20+ Gen2 concept onboarding** across Labs, Diagnostic Reports, Cardiology, Radiology, Orders, Referrals, Pharmacy, Problems, Medications, and other domains; reduced onboarding time from approximately **2 weeks to under 1 week** through API guidance, documentation, PR reviews, debugging, testing support, and release readiness.
- Built and led the India Clinical Reporting team by hiring, onboarding, mentoring, and unblocking engineers; served as **tech lead** for **8+ engineers** in IDC across **3** major products and contributed to broader org growth through **100+ interviews**, **20+ hires**, and top hiring contributor recognition.

Google

Sep 2021 – Feb 2024

Software Engineer II

Bengaluru (Hybrid)

- Worked in the **Search India** team, developing education-domain features for exam OSRPs to deliver structured educational content.
- Built the **Exam Quiz** feature to improve user engagement with interactive learning modules.
- Migrated architecture from entity-driven to intent-driven, impacting **0.05%** of Search traffic.
- Launched localized **Exam OSRP** experiences with tabs and content in Hindi, Tamil, and Telugu to improve accessibility.
- Designed and integrated a scalable **Language API** for Indic locales in lower-tier cities.
- Collaborated with cross-functional teams to resolve issues, align requirements, and prioritize enhancements.
- Worked on a large-scale **monorepo** codebase involving **C++, Java, Python, gRPC, protobuf**, and internal technologies.

Amazon

Jul 2020 – Aug 2021

Software Development Engineer I

Hyderabad

- Worked in **Amazon Finance Automation**, building statistical and ML-powered systems to detect invoice fraud, duplicates, and anomalies at scale.
- Implemented **3** ML-based anomaly-detection rules using **Isolation Forest**, identifying over **100M USD** in anomalies.
- Reduced anomaly reporting latency from **24 hours** to near real-time through **Gandalf-Veritas Integration**.
- Built APIs and monitoring dashboards, and used **AWS CDK** to create infrastructure and CI/CD pipelines.
- Developed microservices using **Java, Kotlin, TypeScript, Python, ML, Elasticsearch, DynamoDB**, Coral & Smithy framework and AWS technologies.

HackerEarth

Jan 2020 – Jun 2020

Problem Curator Intern

Bengaluru

- Created and tested algorithmic problems for hiring contests at companies including Infosys, Google, Facebook, Nokia, PayPal, and Salesforce.
- Presented a **2-day / 10+ hour** Advanced Data Structures and Algorithms workshop at MNIT Jaipur to **120+** attendees on behalf of HackerEarth.

Education

Lovely Professional University
B.Tech. in Computer Science Engineering, Specialization: Machine Learning

Jul 2016 – May 2020
Jalandhar, Punjab — CGPA: 9.06/10

Technical Skills

Languages	Java, C++, Python, TypeScript
Databases	MySQL, DynamoDB, MongoDB, Redshift, Object Storage
Cloud & Infra	AWS, OCI, Docker, Kubernetes, CI/CD, Terraform/CDK
Distributed Systems	Kafka, gRPC, Redis, Elasticsearch, Microservices, WebSockets
AI & Machine Learning	Scikit-Learn, Isolation Forest, Anomaly Detection, Gen AI, MCP Server, Agents
Miscellaneous	System Design, API Design, Performance Tuning, Code Reviews, Mentoring, Documentation

Achievements

Professional & Leadership

- Promoted to **Tech Lead**, owning architecture, delivery, and technical direction for a multi-service healthcare platform and leading **7 engineers**.
- Oracle Certified Bar Raiser; conducted **100+ interviews** and contributed to **20+ hires** and OraHacks Judge to mentor and evaluate 10+ teams for AI related projects and POC to production guidance.
- First student from the university to receive a **direct SDE full-time offer from Amazon** during third-year on-campus internship hiring.

Cloud & Technical Certifications

- Oracle Cloud Infrastructure 2025 Generative AI Professional
- Oracle Cloud Infrastructure 2025 Certified Developer Professional
- Oracle Cloud Infrastructure 2024 Certified AI Foundations Associate
- CodeChef Certified Data Structures and Algorithms Programme (**CCDSAP – Advanced**)
- Earned **30+ technical certifications** across computer science, cloud, and software engineering.

Competitive Programming & Coding Excellence

- Secured **World Rank 1** in CodeChef October Challenge 2018 (Div 2).
- Qualified for **ACM-ICPC Asia Regionals**; secured **85th** rank in Gwalior-Pune regionals, 2018.
- Secured **2nd** rank out of **175 teams** in University Coding Contest at LPU.
- Secured **5th** rank in the national coding contest “ALOHOMORA” at NIT Durgapur.
- Secured **21st** rank in a national coding contest at LNMIIT Jaipur.
- Solved **1000+** problems across major competitive programming platforms.

National Exams & Academic Rankings

- Obtained **99.98 percentile** in eLitmus Quantitative Aptitude.
- Secured **86th** rank among **60,946** candidates in Rajasthan Pre-Engineering Test, 2014.
- Secured **15,550** rank among **1.26 lakh** candidates in JEE Advanced.
- Participated in **3 hackathons**, developing projects in machine learning and web development.

Online Profiles

 Github	 Leetcode Rating: 1811* top 10%	Codeforces Rating: 1813* Expert	CodeChef Rating: 2022* 5-Star

Personal Projects

- Cards Game | Node.js, Socket.IO, MERN, Docker, Nginx, AWS EC22026 – Present
 - Built a real-time multiplayer platform for traditional Indian card games with integrated group chat and culturally rooted gameplay, emphasizing scalability and intuitive UX.
- Udhari App | Flutter, PostgreSQL2025 – Present
 - Built a person-to-person lending app with upfront interest terms, partial repayment tracking, and friendly reminders to improve repayment likelihood while keeping the experience simple and relationship-safe.
- CouplesCraft | React, TypeScript, Leaflet, Node.js, MongoDB, OCI2024 – Present
 - Built a location-aware recommendation platform that helps couples discover and plan date ideas, track important moments, and build shared memories using real-time geospatial filtering, budget-based ranking, and interactive map-based discovery.
